

First announcement

"Asymptotics, Phases and Chaos, Optical and Quantum"

A conference in honour of

Michael Berry

on the occasion of his **70th birthday**

Organizers: M. Dennis, J. Keating, T.H. Seligman
Local Organizing Committee:

September 7th-9th 2011

Auditorium ICF - UNAM Cuernavaca, Morelos, Mexico

This three-day meeting, is devoted to theoretical and mathematical aspects of wave physics and physical asymptotics, and is held in honour of Michael Berry on his 70th Birthday.

Michael's contributions have been seminal across the gamut of wave and ray dynamics, especially in quantum chaology, geometric phases and the subtleties of optical interference. We therefore will focus on these subjects.

Submissions for oral and poster presentations are warmly invited. Graduate students and postdocs are particularly encouraged to apply. Requests for oral presentations should be received by July 15th and request for posters by August 15th.

For more information please refer to the web page, send us an email.
