

FIRST ANNOUNCEMENT

**A celebration with chaos:
from RMT to quantum information**

Symposium in honour of

THOMAS H. SELIGMAN

CENTRO INTERNACIONAL DE CIENCIAS
AND
INSTITUTO DE CIENCIAS FISICAS, UNAM

Cuernavaca, Mexico, July 28-August 1st, 2014

We are organising a symposium on the occasion of the 70th birthday of Thomas H. Seligman. We intend to concentrate the symposium on a set of subjects where the work of Thomas has had a great impact, and in which he is still active. Roughly these may be summarised as follows:

Modelling by random matrices
Quantum chaos and chaotic scattering
Quantum information

We invite all colleagues who are active or interested in this field to join the symposium. We encourage all participants to contribute actively to the symposium by either a poster or a talk which will be decided based on the submissions we receive. In order to give more time for discussions, we encourage those who will speak to present part of the material in the poster session as well.
